Organization Profile/Description

The NANP Legislative Affairs Division is here to fight for YOU! The truth is that many students, recent graduates, and even our seasoned professionals don't often realize that the laws surrounding their work as holistic nutrition professionals vary from state to state. NANP Legislative Affairs works to stay abreast of ongoing legislative efforts throughout the U.S. that would limit your right to practice. As the Legislative Affairs Specialist, Laura Waldo is available to provide consultations to NANP members regarding current laws, Scope of Practice, and Telehealth. She will train you to become an industry activist, so your lawmakers can hear your voice and stand by your side attending legislative hearings representing you in your state. Please contact Laura for your personalized consultation.

In today's ever-changing landscape of legal rights to practice, you will have peace of mind with full access to the NANP Legislative Affairs Division. Please contact Laura for your personalized consultation.
